# Start Drawing – Pencil Tool

1. Select "Pencil" tool

Choose a Color

1. Touch a "Color" box. It then will show a color dialog box.

Choose a Color

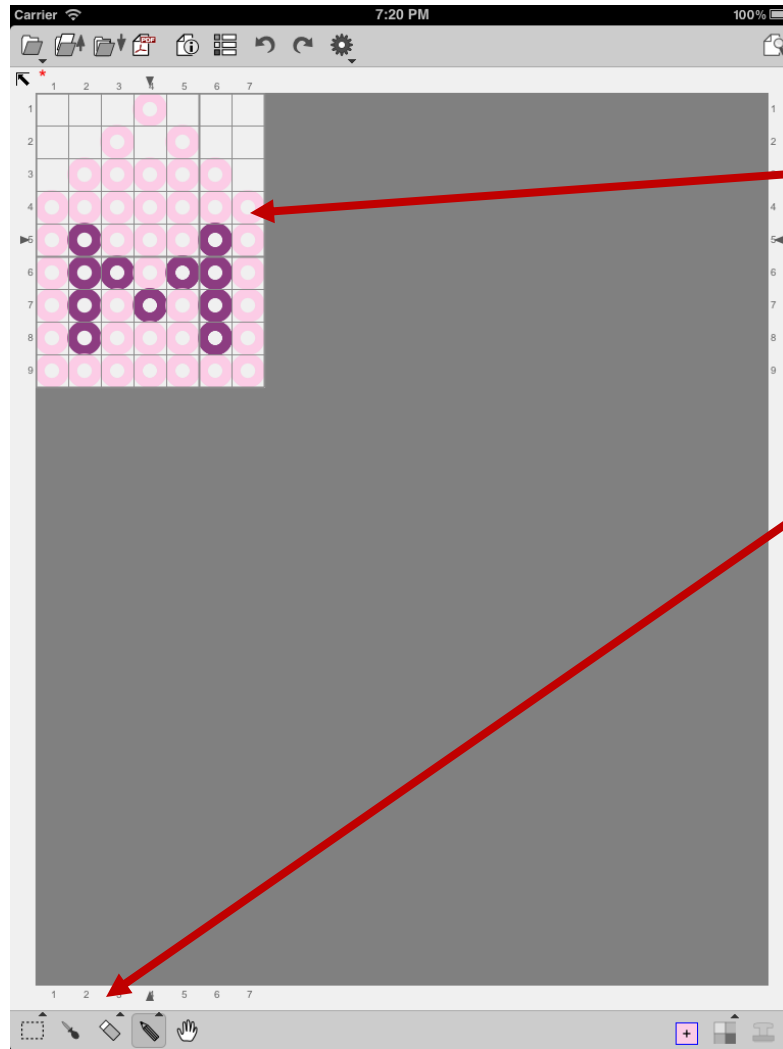

1. Select "Color Charts"

2. Select color chart you want to use. (Here we use Perler Beads)

3. Touch and drag to view the entire color chart

4. Select a color you want to use.

5. The color information and selected color is shown here.

Drawing with a pencil tool

1. Touch cells to draw a shape

2. If you made a mistake, use eraser tool to erase.

Saving a file

1. Touch "Save" icon

2. Change the file name to something understandable.
(The default name is generated based on a timestamp.)
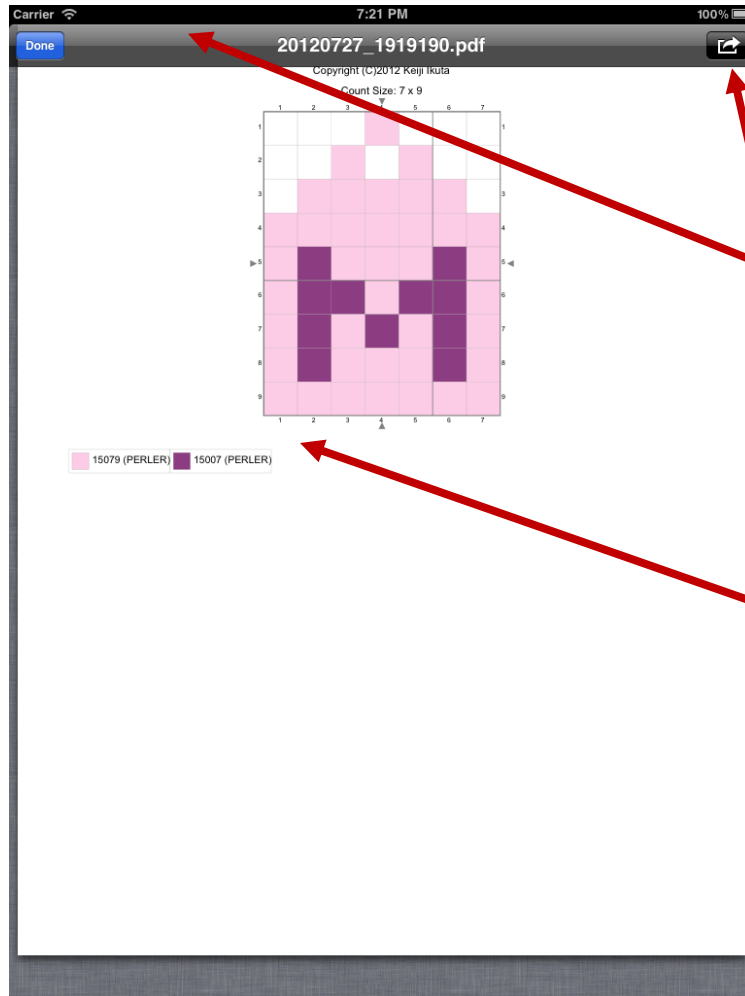

Generating a PDF

1. Touch "PDF" icon

2. Select options to generate a PDF

3. Choose a mesh size (or use "Fit to one page" to print a chart in one page)

4. Ruler's direction (A down arrow means e.g. "1,2,3…". A up arrow means e.g. 10,9,8,…)

5. Touch "Generate PDF" button

Generating a PDF

Here is your chart!
This view is iOS standard PDF viewer.

1. Touch anywhere to bring a menu bar.

2. Use this tool to email or print the PDF

A color table is here
